

LETTER OF RECOMMENDATION

To whom it may concern,

It is my genuine pleasure to write this letter of recommendation for Mr. Bhavesh Dhake who is seeking admission to your esteemed university. I have known him since 2021 when he joined our **firm** as an intern. After managing and interacting with him extensively, I could observe his tremendous fervor, excellent work ethic, and solid technical understanding of information security. I am thus confident that he would make an outstanding graduate student and recommend him strongly to you.

As I look back on our interactions, I recall that Bhavesh made a keen impression on me as soon as he joined our **organization**. Even though we were going through a critical period, he blended in quite well, or rather, he thrived under our challenging work paradigms. In fact, I attribute his success to his unequivocal passion for learning and constantly evolving himself, traits I have observed more prominently the longer we have worked together.

With such passion and interest, it is no surprise that Bhavesh contributed significantly to the **firm**. He played a key role in **security testing** and securing the digital assets of clients from external malicious attacks. Further, he also proved his mettle by performing vulnerability assessments, and penetration tests, which has been highly appreciated. Based on this, I can confidently state that he has a stronghold in Web Application Security, API Security, and Network Security.

Having said that, I would like to draw attention to Bhavesh's exemplary work ethic that brought all of his endeavors to success. Before beginning a project, he always sought to gain an in-depth understanding of the technologies involved, and I found it astonishing to see the zeal with which he researched different resources for the same. In fact, the documentation and resources he found for API Security, for example, proved extremely valuable and were used in our subsequent projects. Added to this, he is a highly self-motivated individual with minimal need for supervision which made him extremely reliable. His work, on the other hand, has always been precise, timely, and of high quality. As such, I am confident that the dedication and enthusiasm with which he undertakes his responsibilities would enable him to flourish in his graduate school pursuits as well.

On a more personal note, it was a joy having Bhavesh work here. His unflaggingly positive attitude and receptivity to suggestions and feedback made every interaction with him enjoyable. He is also a sociable person who worked well in a collaborative environment and was always ready to help others when they needed it.

Thus, I enclose this letter as my strong endorsement of Bhavesh's tenacity, aptitude, and industriousness. I fully expect him to succeed as a cyber security professional, and I wholeheartedly recommend him to you. If you need more information about how he would make an **exemplary** graduate student, feel free to contact me at **nandac@digisec360.in**.
